- Frequency setting conditions
  - 1. Frequencies are set at normal temperatures (+25±2 °C).
  - Frequencies are assumed using of a ground pattern attached to the underside of an oscillator.
- If you require a product with a different frequency, power supply voltage, frequency control range, etc. to the standard specifications, please contact us with your enquiries.
- \*1. Products without the AFC (Automatic Frequency Control) function are available. If you require such a product, please contact us.
- \*2. A DC-cut capacitor is not embedded in this crystal oscillator. Connect a DC-cut capacitor (1,000 pF) to the line-out terminal of the oscillator.
- \*3.This is a representative specification. The specifications may change according to the frequency that you request.
